Frontline Solutions is the only publication that cuts through the hype to bring you the expert intelligence you need for sound decision-making on selection and purchase of today's cutting edge automation products, tools and technologies.

From inventory and asset management to industrial tracking systems... application development to supply chain integration... warehouse

management systems to RFID... Frontline Solutions is your guide to how data is collected, shared, stored and used.

News, research and analysis, feature stories, and case studies plus monthly departments deliver the components needed for successful front line IT implementations, including:

- ▶ **Software** – features user profiles, news, analysis and new product information for each of the key front line environments -- Manufacturing, Warehousing, Logistics and Field Service.
- ▶ **Mobile & Wireless** – shows you how to boldly go where PCs, laptops and cables can't.
- ▶ **Automatic Data Capture** – with the latest on bar codes, RFID, labeling systems and more.
- ▶ **Product Guide** – profiles the product categories you purchase most.
